

AL-SIT3

Bottle-Cap Seal Integrity Tester

Ingenious design measuring 3 bottle sealing in one single pass
independently marked and color coded testing position for clear recording
individual on/off control of all 3 testing stations

Optional extra Fixture Holders
shown in this photo is a set of 12 pieces
for a 12 head Bottle Capper.
Additional Fixtures can be ordered separately
on other specific bottle/cap sizes, and based
on the number of heads of a Bottle Capper.
each AL-SIT3 are shipped with 3 Fixture sets
as shown in the instrument photos.

at **Advancelab**, we pride ourself with producing instruments with **Highest Quality Standards**.

Fully featured designs such as :

Ultra-Quick fitting of cutted Bottle into Fixture and size changes

Flexible Fixture design with full **numbering index codings** allows demanding Q.C. laboratories to perform **full testing of all sealing heads** on a capper as needed, rather than depending on only **un-reliable single spot checking** of randomly picked bottle from the Capping Head .
